GPS TRACKING IS NOW A TOPIC OF DEBATE

GOENKAN GLORY

DO YOU KNOW WHAT IS THE LOCATION OF YOUR KID ? IF YOU DON'T, THEN YOU CAN THINK TO IMPLANT A GPS TRACKER. AS EVERYONE KNOWS THAT IN THIS ERA THERE ARE MISCHIEFS. BUT TO MAKE SURE THAT YOUR CHILD IS SAFE YOU CAN THINK OF A GPS TRACKER. AS IN TIMES OF CALAMITIES / DANGEROUS ACTIVITIES IT WILL BE HELPFUL . YES, GD GOENKA GLOBAL SCHOOL IS HOLDING A DEBATE ON THE TOPIC "DOES PARENTS HAVE THE RIGHT TO IMPLANT A GPS TRACKER" ?

At present, during the CoronaVirus pandemic , students are having virtual classes. During these classes teachers are putting their efforts for us to present the chapter for the children who don't have books. Teachers don't want to only just teach us as per the syllabus, also want to develop new skills. That's why there are trivia quizzes, treasure hunt and debates being held JUST TO MAKE OUR LEARNING PROCESS FUN AND HELPFUL. Earlier there was a debate being held in May. It was a fantabulous debate, all the 8th and 9th graders had fun. Not only debates are being held but mime competition, musical competition, One minute act, talent show, the list is endless. Not forgetting, there are virtual dance, music, fitness classes being organised.

We all read this letter to know about what is going on in our GD Goenka Global School, Noida. Our teachers had held a debate, the topic was 'Should parents have the right to implant GPS trackers on their children.' If you ask me this is a great topic, we all can learn more about the parents views and children's views on this. Our young debaters did a splendid job in asking questions and delivering their speeches. It is highly appreciated. My group and I are honoured to write the newsletter about this debate. To be honest some of us had trouble asking questions and I am sure that even the interjectors did. Mr. Harashish asked Ms. Yash a question that was 'Master speaker you had said that GPS microchip allowed the parents to make rational decisions how will they allow the parents to take rational decisions if they know, "yes I have been planted a chip in my child", leading to false sense of security GPS requires Wi-Fi and cellular connection and if it is not available then the location will be shown in the last review and the parents will see that and they will think "yes their child and is safe "but actually their child is somewhere else and not safe. What is your take on it?' The answer was 'Master interjector this GPS tracker has not been released yet and is still in development and I am sure that the people will undertake consideration and make sure that this is not reliant on Wi-Fi and cellular connection'. Ms Rachita asked Ms Tisya a question that was 'Ms speaker what is the GPS tracker if the child gets hacked then your child gets vulnerable to abduction please give me your views on this'. And I simply love the answers and the counter questions?' Ms interjector I would just like to say as my predecessor speaker said GPS tracker cannot be hacked easily and it is not easy to find the GPS which is planted inside the child's body.' The counter question 'Ms speaker so don't you think that the chips can be hacked by anyone'. The answer 'the other person does not know that a child has been chipped with a GPS tracker'. Another counter question 'But Ms interjector transmitter is still there right anything can happen'? The answer 'How sure can the kidnapper be that the child has been implanted with the GPS tracking chip.' Look at the professional way the work is done by each and every child even during the lockdown education and finds a way to break through. No virus, no other disease, no other problem can stop education in the school. The virtual classes are very good. We learn plenty from them as much as we do in our physical classes. Even our debate was conducted online and it was splendid. I muted myself and I was clapping after each and every question and answer given by the students. The way of speaking of the children, the way of delivering their speeches that was marvelous. Thank you

Our reviews

What a debate it was today! All of us were dumbstruck with it. It was a spectacular job done by each and every student. They all answered very well even the rebuttals and counter questions as you can see were spectacular. Our young debaters debated as they were in an international debate. Our first speaker of the day was Yash Goel and the last speaker was Kushagra Saxena. Every single debater and rebuttal performed very confidently. Once speaker's speech was over, there were so many people who wanted to interject. But only two people were allowed to interject. And Sushma ma'am was in a dilemma to choose the interjecter! Not forgetting Vijayata ma'am and Gunjan ma'am were so impressed by the children as they all were being so scientific. Finally our debate concluded by the kind words from our Jury members and Principal ma'am.

Credits

We all thank our teachers to put in so much efforts for us. And by facilitating these debates, our teachers are developing our debating and journalism skills in our learning process. We are thankful to our honourable judges for fairly judging. Our team is also grateful to be blessed by our Principal ma'am, Director sir and Chairperson ma'am by the whole debate.
